

GROWRITE™ AND BUDRITE™

Here are some of the benefits and advantages:

- Unsurpassed growth rates
- Excellent Yields
- High Potencies
- Consists of the finest grade mineral salts available
- Contains chelated trace elements
- Individual Vegetative (**GROWRITE™**) and Budding and Flowering (**BUDRITE™**) formulations
- Easy to mix and use following instructions on label
- Thousands of very satisfied customers Australia-wide
- Formulation is designed specifically for the budding plant that everyone is growing
- Formulation is based on the latest research conducted in Holland
- Suitable for all hydroponic media including rockwool, expanded-clay, perlite and vermiculite.
- Suitable for all hydroponic systems including drip, flood and drain and nutrient film technique (NFT)

GROWRITE™

A completely soluble hydroponic nutrient, high in nitrogen for vigorous and healthy plant growth during the 'Vegetative Stage of Growth'

GROWRITE™ is gentle to the roots, whilst delivering the nutrition necessary for maximum growth rates.

GROWRITE™ has demonstrated unsurpassed growth rates using artificial light sources.
