

Undoubtedly the most popular soil products in Holland and the world today!

Holland's best growers always push the limits. That's why we rely on them to help us develop intelligent soil technologies that push plant performance to the next level in size, yield and taste.

INSIST ON THE MARKET LEADER!

Take our market leading TERRA™ soil products for example. Developed during extensive Dutch field testing, TERRA™ VEGA (Grow) and TERRA™ FLORES (Bloom) single component nutrients deliver a whole new level of performance in size, yield and taste on a consistent basis when cultivating plants in soil, indoors or out. And the our superior Dutch RHP Quality Assured TERRA™ PROFESSIONAL PLUS+ soil substrate is enriched with essential organic boosters for faster growth, shorter harvests and extreme yields. Best of all when used together they overwhelmingly out produce all of their competitors!

PROVEN WINNER FOR EXTREME YIELDS ON SOIL!

The 100% raw organic materials used to make TERRA™ PROFESSIONAL PLUS+ soil substrates are guaranteed to be unlike anything you'll find in a garden centre.

They contain a blend of soil, compost, white peat, tree bark and a special "natural plant booster" which is a blend of potent organic ingredients scientifically proven to stimulate root growth and protect your plant against soil diseases. If you are going to grow in soil, this is the soil mix you want to use.

DON'T GAMBLE WITH YOUR PLANTS HEALTH!

Did you know that almost all soil substrates sold in gardening outlets today may not be suitable for horticultural use at all? They can contain inferior grades of peat or harmful impurities which are highly damaging to plant health. Don't gamble with your plants health - use TERRA™ PROFESSIONAL PLUS+ soil substrate that is certified for horticultural use according to the strict Dutch RHP Quality Assurance Standard. Demand the CANNA standard, it guarantees that the soil substrate is free from weeds and pathogenic organisms for that next level in size, yield and taste.

UNMATCHABLE GROWTH RATES & YIELDS!

Soil substrate has its own cation-exchange complex which needs to be catered for if you want to extract the maximum benefits from it. This means that soil binds and excludes nutrients and as a result not all the given

nutrients are available to the plant. This signifies that next generation terraponic nutrients are necessary. Market leading TERRA™ nutrients from Holland are scientifically formulated to ensure that your plants provide you with the greatest yields possible when growing in soil substrates.

ACCELERATES PLANT GROWTH AND BIOMASS!

Use TERRA™ VEGA during the first stages of plant growth - the vegetative phase. It accelerates the generation of lush, early growth on cuttings, seedlings and transplants resulting in more lateral shoot growth and greater plant biomass for a winning result! It's also an ideal feeding for mother plants used for making clones. Rich in rapidly absorbable nitrogen compounds and pharmaceutical grade chelated trace elements, TERRA™ VEGA ensures complete absorption of nutrients during the critical stages of plant growth.

15-35% INCREASE IN FRUIT & FLOWER SIZE

Use TERRA™ FLORES for the blooming and fruiting stages of the plant. Rich in elements like potassium, phosphorous and pharmaceutical grade chelated trace elements it guarantees to pack weight and size on your flowers and fruit like no other soil nutrient can!

As the market leader, TERRA nutrients have a biotropic effect and are so advanced they anticipate exactly what the plant needs. These products have worked for countless growers around the globe, time after time. Try it for yourself today!

TERRA nutrients are available in 1L, 5L and 25L. TERRA™ PROFESSIONAL PLUS+ soil substrate is available in 50L bags. All CANNA™ award winning nutritional plant products are manufactured in Holland under extreme laboratory conditions and are tested in our own laboratories prior to bottling and export to ensure full formulation compliance.

Try the TERRA™ system and the CANNA™ range of high performance plant products for yourself today from all leading hydro stores. For service call FREE CALL 1800 4 CANNA or visit us on the web at www.canna.com.au

A HIGH PERFORMANCE DUTCH PRODUCT

CANNA TERRA

Plant Development stage		Light per day (hours)	Terra Vega mL/L	Terra Flores mL/L	RHIZOTONIC mL/L	CANNAZYM mL/L	PK 13/14 mL/L	BioBOOST mL/L	EC+
GROW	1. Start Root Formation - Duration +/- 1 week	18	1 - 3	-	4	-	-	-	0.2 - 0.6
	2. Vegetative Stage - Duration +/- 1 to 3 weeks Fast growth.	18	3 - 5	-	1 - 2	2.5	-	-	0.6 - 1.0
	Bloom Stage 1 - Duration +/- 1 to 2 weeks Growth stagnates. First signs of fruit & formation.	12	-	3.5 - 4.5	0.5	2.5	-	2 - 4	1.0 - 1.3
BLOOM	Bloom Stage 2 - Duration +/- 1 week When small fruit & flower buds develop.	12	-	3.5 - 5	0.5	2.5	1.5	2 - 4	1.1 - 1.4
	Bloom Stage 3 - Duration +/- 2 to 3 weeks As fruit and flower buds increase in size.	12	-	3.5 - 4.5	0.5	2.5	-	2 - 4	1.0 - 1.3
	Bloom Stage 4 - Duration +/- 1 to 2 weeks Fruit increases in size and ripen.	12	-	-	-	2.5	-	2 - 4	0.0

The recommended EC levels are based on a tap water EC of 0.0 mL/cm. If your tap water EC is 0.5 the recommended EC from the table should be 0.5 higher. Recommended pH 5.2-6.2. This grow guide has been used successfully by many growers worldwide. This does not mean that this guide can be used successfully with all types of plants. The crop also depends on other factors than just a good grow guide. E.g. Light, humidity, nutrient temperature and air are all very important factors for successful growth that this guide does not cover.

"It's amazing how easy it is to grow large blooms using TERRA!"
