

A HIGH PERFORMANCE DUTCH PRODUCT

# CANNAZYM

## Grow super indoor plants.

CANNA was awarded first prize for its revolutionary plant products at the Amsterdam Growers Festival, a prestigious annual expo in Holland for hydroponic and soil growers. CANNA is the Dutch expert and internationally recognised world wide leader in the manufacture of professional plant technologies for cultivating plants in cocoponic, hydroponic, soil and substrate cultivation processes. The use of our cutting-edge, nutritional plant products are clean, simple, easy to use and do not harm the environment. Everyone, including inexperienced growers, can achieve amazing results with them! Each CANNA product has been carefully developed to offer you the greatest yields possible when using a specific growing medium or method. The secret behind CANNA's superior quality is found in a carefully balanced and integrated blend of the finest main and trace elements for each growing medium and fertiliser combination.

**CANNA**  
The solution for growth and bloom

Today, CANNA is available throughout Europe, Australia, North America, the Middle East and Africa. It has been voted by experts around the globe as Worldwide No.1 in plant technologies. **Quality proves itself!**

# A clever natural product that gives you larger harvests faster!

**CANNAZYM™** is Holland's largest selling enzyme booster that uses the tools of nature to unlock the ultimate in growth rates and greater yields in rapidly growing plants.

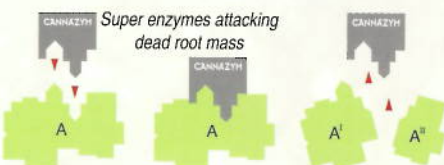

It sets the benchmark for this all-natural biocatalyst, root decomposer and grow medium improver. Used as an additive to your regular nutrient, it contains a carefully balanced and integrated blend of more than fifteen different live organic super enzymes and essential plant vitamins that rapidly convert dead root mass into minerals and sugars to allow for new healthier roots to form, supercharging vital nutrient uptake for better root development, vigorous growth, larger buds, blooms, fruits and flowers.

## UNIQUE 3 IN 1 PRODUCT!

In addition to supercharging nutrient uptake, **CANNAZYM™** is enriched with rare desert plant extracts that elevate the plants immune system to invincible levels to protect against plant sickness. Plus easily absorbable vitamins produce strong new root growth. Additional biogrowth stimulants enhance overall plant growth and chemical reactions within the plant to guarantee a healthier, more powerful plant. An amazing product that is versatile, incredibly effective and very affordable!

## MAINTAINS PLANT HEALTH & VITALITY!

Enzymes are substances that speed up the reactions in living organisms. E.g. enzymes play a vital role in our digestion

to break down food. The super enzymes in **CANNAZYM™** accomplish in minutes and days what would take normal plant functions weeks and months to achieve by rapidly converting dead root mass into minerals and sugars, which are a valuable source of nutrients for the plant as well as for the soil environment. Furthermore the minerals and sugars that are formed are important for the bacteria located close to the roots. These bacteria provide the plant with increased protection against plant sickness and enhance the exchange of nutrients and vitamins within the roots. A rapid breakdown of the dead root remains creates a balanced air and soil hydrology

for the root environment whereby the risk of a fungal, bacterial or viral attack is prevented. No gardener should be without the valuable insurance that **CANNAZYM™** brings!

## CANNAZYM™ OPTIMISES YOUR PLANTS!

- Puts your plants into overdrive by creating a balanced air and soil hydrology leading to even **BIGGER** yields.
- Functions as a biocatalyst to multiply the growth of beneficial micro organisms that aids the plants natural defence system to combat plant sickness, allowing a healthier, stronger and more robust plant.
- Stimulates new root development through easy-to-absorb vitamins that maximises overall nutrient uptake and distribution for quick and effective results.
- Enhances overall plant growth and chemical reactions in the plant.

## FOR THE ULTIMATE PLANT PROTECTION!

- Starting from the second week of cultivation, add **CANNAZYM™** to your nutrient solution at the rate of 2.5mL per litre (1:400) until harvest.
- Do not prepare more than can be used within a ten day period.
- As **CANNAZYM™** uses live enzymes do not use in combination with Hydrogen Peroxide based products.

**CANNAZYM™** is 100% organic and is suitable for all media and systems. It is available in 250mL, 1L, and 5L. The manufacture of all **CANNA™** award winning nutritional plant products occurs in Holland under extreme laboratory conditions. Testing in our own laboratories prior to bottling and export ensures full formulation compliance.

Countless experts around the globe vote **CANNAZYM™** as the world's #1 enzyme booster! Unlock the magic of **CANNAZYM™** and the **CANNA™** range of high performance plant products for yourself today from all leading hydroponic stores.
