

A HIGH PERFORMANCE DUTCH PRODUCT

PK 13-14

# Holland's Secret Weapon

CANNA was awarded first prize for its revolutionary plant products at the Amsterdam Growers Festival, a prestigious annual expo in Holland for hydroponic and soil growers. CANNA is the Dutch expert and internationally recognised world wide leader in the manufacture of professional plant technologies for cultivating plants in cocoaponic, hydroponic, soil and substrate cultivation processes. The use of our cutting-edge, nutritional plant products are clean, simple, easy to use and do not harm the environment. Everyone, including inexperienced growers, can achieve amazing results with them! Each CANNA product has been carefully developed to offer you the greatest yields possible when using a specific growing medium or method. The secret behind CANNA's superior quality is found in a carefully balanced and integrated blend of the finest main and trace elements for each growing medium and fertiliser combination.

**CANNA**  
The solution for growth and bloom

Today, CANNA is available throughout Europe, Australia, North America, the Middle East and Africa. It has been voted by experts around the globe as Worldwide No.1 in plant technologies. **Quality proves itself!**

# Holland's ultra premium flowering stimulant for unmatched fruit & flower size!

PK 13-14 from CANNA in Holland is the proven world wide market leader and No. 1 flowering stimulant scientifically developed to increase size and weight of fruiting and flowering plants. Holland's secret weapon is now available to be unleashed in your garden too!

## UNMATCHABLE FLOWER SIZE & FRUIT WEIGHT!

Testimonials from countless growers around the globe who use PK 13-14 report larger, heavier yields of fruits and flowers with an average yield increase of 35%. Our powerful formulation awards unparalleled flower size, weight and fruit swelling. Best of all it's totally unique, absolutely safe, easy to use and incredibly rewarding!

### ULTIMATE PERFORMANCE IN A SINGLE BOTTLE!

PK 13-14 utilises an extremely powerful formulation containing a carefully balanced and integrated blend

high in bio-available phosphorous and potassium for superior flowering results. Unlike other inferior flowering additives, only CANNA™ PK 13-14 has a guaranteed composition of 13% P<sub>2</sub>O<sub>5</sub> and 14 % K<sub>2</sub>O that has been extensively researched, developed and field tested in Holland's labs and greenhouses to arguably work faster and more effectively than all other compositions.

PK 13-14 is an intelligent plant nutrient supplement proven by countless Dutch experts to promote profuse blooms and optimise the performance of modern plant nutrients to radically increase plant yields.

## THE PROVEN WINNER IN EXTREME YIELDS!

Our unique bio-available forms of Potassium and Phosphorus are essential ingredients for the metabolism in the plant and have a direct influence on the flowering and fruiting process. They are the proven winners to help flowers and fruits develop quicker with an enhanced sweetness and flavour. Enjoy the unrivalled purity and results that only the finest Dutch ingredients can bring!

## HOLLAND'S TRULY AMAZING PK 13-14

- PK 13-14 gives you bigger, heavier, superior quality fruits and blooms with an enhanced sweetness and flavour extremely quickly.

- Testimonials from countless growers around the globe who use PK 13-14 report larger, heavier yields of fruits and flowers with an average yield increase of up to 35%.

- PK 13-14 dramatically accelerates the flowering response and is so effective it only needs to be used for a period of one week. It has to be the best value performance stimulant on the market today!

- Only PK 13-14 contains both phosphorous and potassium in bio-available forms that is instantly absorbed and distributed by the plant for rapid and effective results.

- PK 13-14 is environmentally friendly, leaving no harmful residues and very easy to work with. Best of all it produces the great results you want first time, every time!

## EASY DIRECTIONS

To develop heavier, tighter, sweeter fruits and blooms extremely quickly add CANNA™ PK 13-14 at the rate of 1 - 2 mL/L, three to four weeks before harvesting (week five or six of an eight week flowering cycle) to your nutrient tank. Then add flowering nutrient until your desired EC is reached. Use it for one week only. Due to PK 13-14 being pharmaceutical grade, never use it for more than one week! To improve quality, taste and yield add BioBOOST at 2 mL/L. For alternative use follow directions as above however add PK 13-14 without flowering nutrient until your desired EC is reached.

## IMPORTANT PRECAUTIONS

Due to PK 13-14 being pharmaceutical grade it is essential to follow the directions exactly. Never use more than the recommended amount. Never use it longer than the recommended time duration. When used as per the directions, PK 13-14 will reward you with a sizeable increase in yield.

PK 13-14 is suitable for all substrates and systems. It is available in 250mL, 1L, and 5L. All CANNA™ award winning nutritional plant products are manufactured in Holland under extreme laboratory conditions and are tested in our own laboratories prior to bottling and export to ensure full formulation compliance.

Unleash the power of PK 13-14 and the CANNA™ range of high performance plant products for yourself today from all leading hydroponic stores. For service call FREE CALL 1800 4 CANNA or visit us on the web at [www.canna.com.au](http://www.canna.com.au)
