

gnatnix!™ by Growstone

The Only Fungus Gnat Control with
NO Harmful Pesticides or Chemicals!

Introducing the only scientifically-proven,
environmentally-friendly fungus gnat control—
Gnat Nix!™ It's made from 100% recycled glass,
and it's 100% free of harmful pesticides and chemicals.
The bottom line: Plants love it. Gnats don't.

Gnat Nix! is:

- Chemical-free fungus gnat control
- Long-lasting top dressing
- Effective under dry or moist conditions
- Great indoors - outdoors

Scientifically Proven

University trials have proved Gnat Nix! used as a top dressing is an effective physical barrier against fungus gnats. Unlike other top dresses that are limited to one phase of control, Gnat Nix! controls gnats at different points of their lifecycle. It prevents adult emergence from hatching larvae and deters females from laying eggs in the growing media. As a result, the lifecycle of fungus gnats is interrupted, and its population significantly reduced.

Simple to Use

All you need to do is apply approximately ½" - ¾" thick layer of Gnat Nix! top dressing to fully cover the surface of the growing medium in your growing containers. Make sure the entire top surfaces of all your growing containers are fully covered at all times. Irrigate gently to avoid disturbing the protective physical barrier of Gnat Nix! That's it!
